- Rega de impregnação com betume fluidificado MC-70 à taxa de 1,0 Kg/m²;
- Rega de colagem com emulsão de betume catiônica de rotura rápida, à taxa média de 0,5 Kg/m² a 0,3 Kg/m² (no caso de se revelar necessária);
- Camada de regularização em Macadame Betuminoso, com betume de penetração 50/70 e a espessura média de 0,06m;
- Rega de colagem com emulsão de betume catiônica de rotura rápida, à taxa média de 0,5 Kg/m²;
- Camada de Desgaste em betão betuminoso com 0,04 m de espessura, devidamente compactado.

— Perfil Natural do Terreno
— Rasante
